

John Doe

San Francisco, CA | john.doe@email.com | rendercv.com | linkedin.com/in/rendercv | github.com/rendercv

Welcome to RenderCV

RenderCV reads a CV written in a YAML file, and generates a PDF with professional typography.

See the [documentation](#) for more details.

Education

| | |
|--------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Princeton University , PhD in Computer Science – Princeton, NJ | Sept 2018 – May 2023 |
| <ul style="list-style-type: none"> • Thesis: Efficient Neural Architecture Search for Resource-Constrained Deployment | |
| <ul style="list-style-type: none"> • Advisor: Prof. Sanjeev Arora | |
| <ul style="list-style-type: none"> • NSF Graduate Research Fellowship, Siebel Scholar (Class of 2022) | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Boğaziçi University , BS in Computer Engineering – Istanbul, Türkiye | Sept 2014 – June 2018 |
| <ul style="list-style-type: none"> • GPA: 3.97/4.00, Valedictorian • Fulbright Scholarship recipient for graduate studies | |

Experience

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Co-Founder & CTO , Nexus AI – San Francisco, CA | June 2023 – present |
| <ul style="list-style-type: none"> • Built foundation model infrastructure serving 2M+ monthly API requests with 99.97% uptime • Raised \$18M Series A led by Sequoia Capital, with participation from a16z and Founders Fund • Scaled engineering team from 3 to 28 across ML research, platform, and applied AI divisions • Developed proprietary inference optimization reducing latency by 73% compared to baseline | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Research Intern , NVIDIA Research – Santa Clara, CA | May 2022 – Aug 2022 |
| <ul style="list-style-type: none"> • Designed sparse attention mechanism reducing transformer memory footprint by 4.2x • Co-authored paper accepted at NeurIPS 2022 (spotlight presentation, top 5% of submissions) | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Research Intern , Google DeepMind – London, UK | May 2021 – Aug 2021 |
| <ul style="list-style-type: none"> • Developed reinforcement learning algorithms for multi-agent coordination • Published research at top-tier venues with significant academic impact <ul style="list-style-type: none"> • ICML 2022 main conference paper, cited 340+ times within two years • NeurIPS 2022 workshop paper on emergent communication protocols • Invited journal extension in JMLR (2023) | |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Research Intern , Apple ML Research – Cupertino, CA | May 2020 – Aug 2020 |
| <ul style="list-style-type: none"> • Created on-device neural network compression pipeline deployed across 50M+ devices • Filed 2 patents on efficient model quantization techniques for edge inference | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Research Intern , Microsoft Research – Redmond, WA | May 2019 – Aug 2019 |
| <ul style="list-style-type: none"> • Implemented novel self-supervised learning framework for low-resource language modeling • Research integrated into Azure Cognitive Services, reducing training data requirements by 60% | |

Projects

FlashInfer

Jan 2023 – present

Open-source library for high-performance LLM inference kernels

- Achieved 2.8x speedup over baseline attention implementations on A100 GPUs
- Adopted by 3 major AI labs, 8,500+ GitHub stars, 200+ contributors

NeuralPrune

Jan 2021

Automated neural network pruning toolkit with differentiable masks

- Reduced model size by 90% with less than 1% accuracy degradation on ImageNet
- Featured in PyTorch ecosystem tools, 4,200+ GitHub stars

Publications

Sparse Mixture-of-Experts at Scale: Efficient Routing for Trillion-Parameter Models

July 2023

John Doe, Sarah Williams, David Park

[10.1234/neurips.2023.1234](https://doi.org/10.1234/neurips.2023.1234) (NeurIPS 2023)

Neural Architecture Search via Differentiable Pruning

Dec 2022

James Liu, John Doe

[10.1234/neurips.2022.5678](https://doi.org/10.1234/neurips.2022.5678) (NeurIPS 2022, Spotlight)

Multi-Agent Reinforcement Learning with Emergent Communication

July 2022

Maria Garcia, John Doe, Tom Anderson

[10.1234/icml.2022.9012](https://doi.org/10.1234/icml.2022.9012) (ICML 2022)

On-Device Model Compression via Learned Quantization

May 2021

John Doe, Kevin Wu

[10.1234/iclr.2021.3456](https://doi.org/10.1234/iclr.2021.3456) (ICLR 2021, Best Paper Award)

Selected Honors

- MIT Technology Review 35 Under 35 Innovators (2024)
- Forbes 30 Under 30 in Enterprise Technology (2024)
- ACM Doctoral Dissertation Award Honorable Mention (2023)
- Google PhD Fellowship in Machine Learning (2020 – 2023)
- Fulbright Scholarship for Graduate Studies (2018)

Skills

Languages: Python, C++, CUDA, Rust, Julia

ML Frameworks: PyTorch, JAX, TensorFlow, Triton, ONNX

Infrastructure: Kubernetes, Ray, distributed training, AWS, GCP

Research Areas: Neural architecture search, model compression, efficient inference, multi-agent RL

Patents

1. Adaptive Quantization for Neural Network Inference on Edge Devices (US Patent 11,234,567)
2. Dynamic Sparsity Patterns for Efficient Transformer Attention (US Patent 11,345,678)
3. Hardware-Aware Neural Architecture Search Method (US Patent 11,456,789)

Invited Talks

4. Scaling Laws for Efficient Inference — Stanford HAI Symposium (2024)
3. Building AI Infrastructure for the Next Decade — TechCrunch Disrupt (2024)
2. From Research to Production: Lessons in ML Systems — NeurIPS Workshop (2023)
1. Efficient Deep Learning: A Practitioner's Perspective — Google Tech Talk (2022)

Any Section Title

You can use any section title you want.

You can choose any entry type for the section: `TextEntry`, `ExperienceEntry`, `EducationEntry`, `PublicationEntry`, `BulletEntry`, `NumberedEntry`, or `ReversedNumberedEntry`.

Markdown syntax is supported everywhere.

The `design` field in YAML gives you control over almost any aspect of your CV design.

See the [documentation](#) for more details.
